At last

-truly American Style

UNTIL last year men's clothes mirrored foreign style tastes rather than thoroughly American designing ideas.

It was the designers of Kuppenheimer good clothes who first discovered the real American figure and created styles typically American. Now-custom tailors in London and other European centers are copying this country's fashions in men's clothing.

What IS the difference between truly American style and the ideas of London and Europe? Why has the world's center for men's fashions swerved to this country?

-because Americans even express freedom in the lines of their figures, in the way they walk and gesture. It is more than an athletic swing to their actions-it is the spirit of their personalities. Every nation in the world admires it.

-Kuppenheimer clothes designers recognized it and created styles to harmonize with it, blend into it.

American style demands simplicity, sane good taste, and common sense. The average American hates fussisms and affectations.

But in order to express American style in clothes there must be sincerity of materials and splendid tailoring. The style must be crafted into the garments-not pressed on them. Only worthy materials and honest tailoring can accomplish it.

In other words Kuppenheimer good clothes not only give you true American style but they are earnest clothes-real value-true economy.

They help your appearance before the eyes of the passing world.

And they help your pocketbook __because they are the best wearing clothes.

Beware of substitutions and adulterations this Spring-buy clothes that you KNOW are sincere-of a dealer you can rely upon.
